

DATA BREACH

Cyber attacks against local governments are on the rise. Hacks, ransomware, and phishing schemes cost local governments valuable data and precious funds. Utah is no exception, with state and local governments finding themselves targets.

What happens if your data is **STOLEN?**
Even if you pay ransom, your odds of recovery are **50/50**

The State of Utah experienced

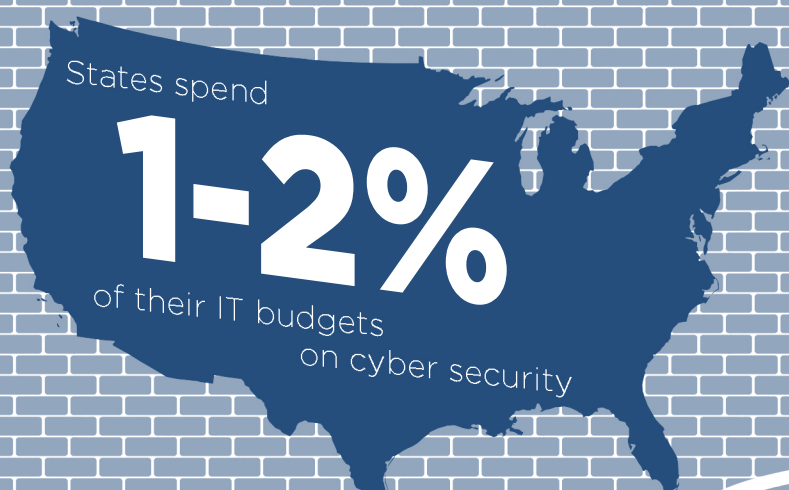

1.9 BILLION

hacking attempts daily in 2020

80,000 in 2010 ↑ 300 million in 2016 ↑ 900 million in 2018

The NSA data center in Bluffdale has drawn unwanted attention to government computer systems statewide

If you fall victim to a ransomware attack, contact UCIP immediately and the Salt Lake City FBI field office as soon as possible at (801) 579-1400
